

Why doesn't my listing show on Realtor, Zillow, Trulia, or Redfin?

Realtor.com, Zillow.com, Trulia.com and Redfin.com are third party companies that buyers and sellers like to go to for listings and comparable information.

- Listings that are listed in your local MLS should be picked up on these sites through an IDX feed directly from your MLS if applicable in your area.
- Since these are third party companies and are pushed out via an IDX feed through your MLS, if your listing is not showing, you will need to reach out to support for each company directly for assistance.
