

How do I launch/edit my Website?

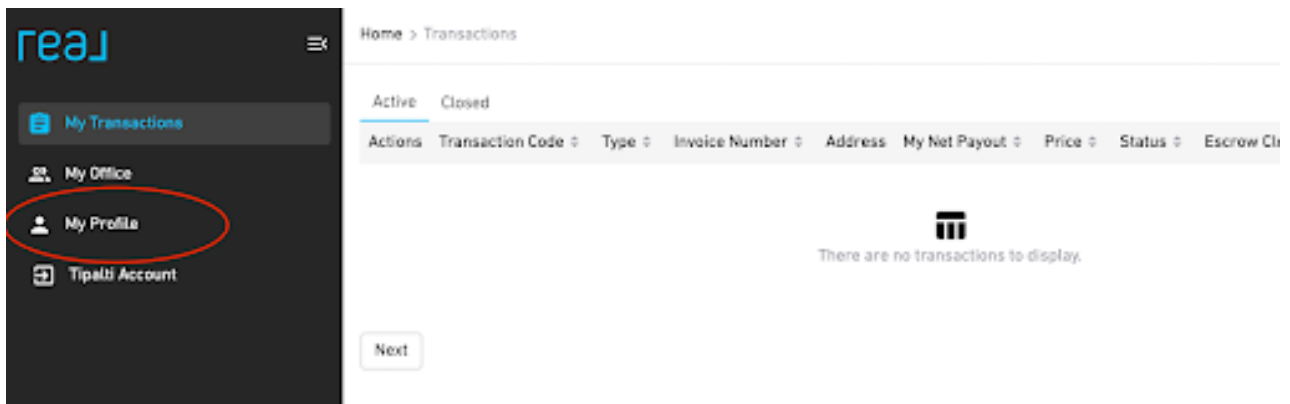

Launching or editing your website is very easy to do and is accessible through your Real mobile app or the desktop version of the app found at bolt.therealbrokerage.com.

To launch/edit your Website, you will need to log into your app account. You can do that from your mobile app or from the desktop app found at bolt.therealbrokerage.com.

Log into your account:

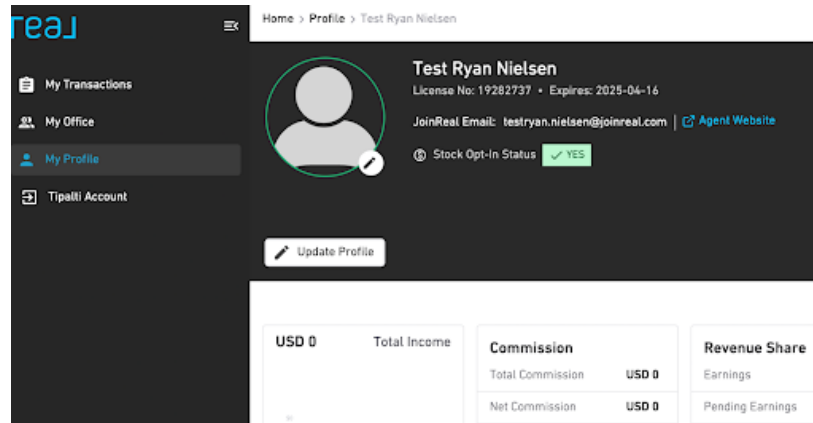

The screenshot shows a login page with a dark circular icon at the top containing a white key icon. Below the icon is the word "Login" in bold. There are two input fields: "Email / Username" with the text "Test@therealbrokerage.com" and "Password" with masked characters "*****". A blue "Login" button is positioned below the password field. At the bottom left, there is a link "Join Real" and at the bottom right, a link "Forgot Password?".

Once logged in click on My Profile:

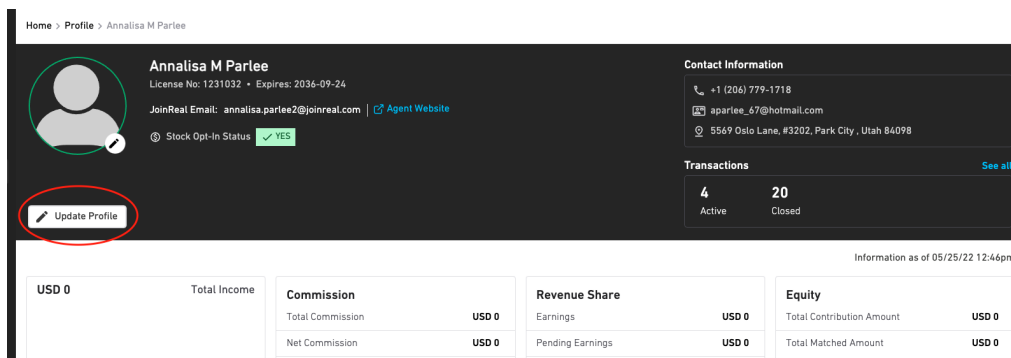

You will then see a screen similar to this below, if you haven't created your agent website yet, you will see Create Agent Website instead of Agent Website like in this example.

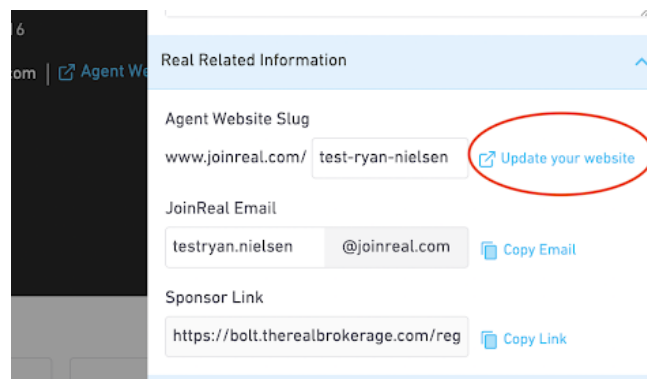

If you do see Create Agent Website, you will click on that link.

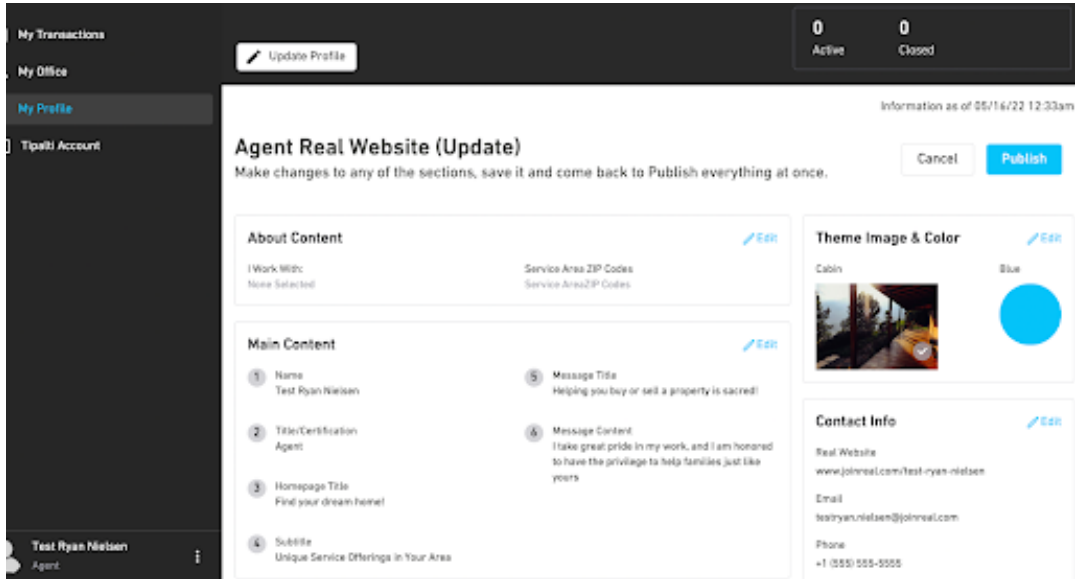

If you see Agent Website, meaning your website is already created, click Update Profile:

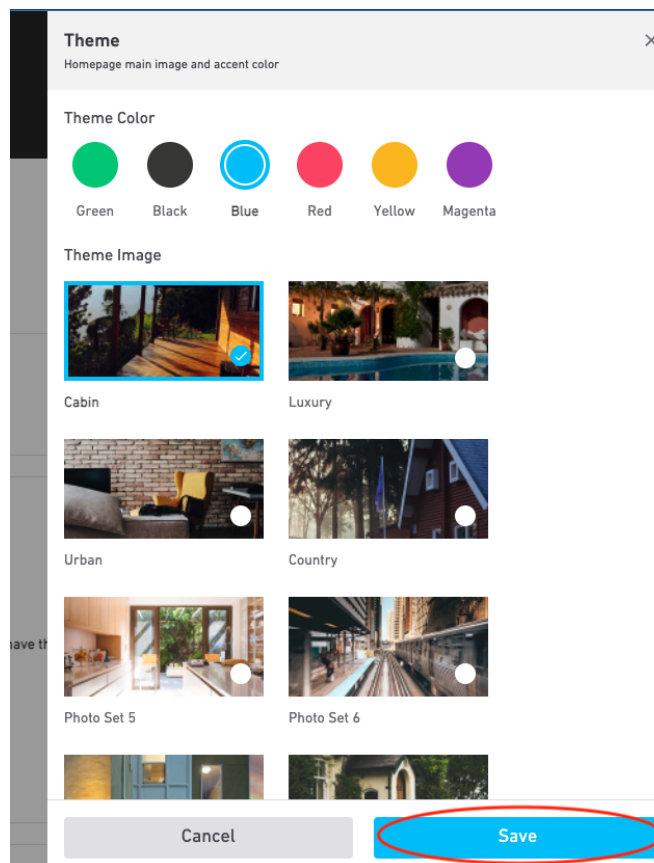

The Edit Profile Screen will open to the Right. Scroll down until you see Real Related Information and click on Update your website:

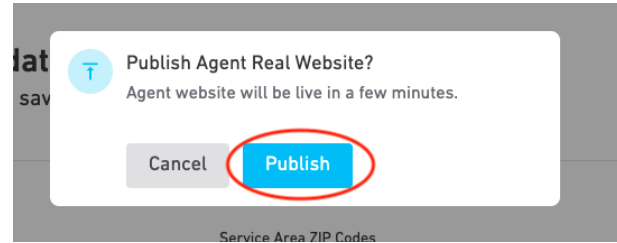

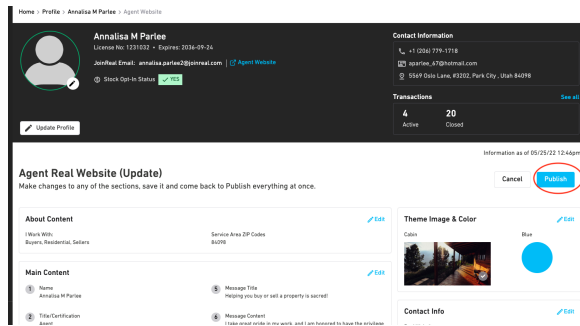

Here you will be able to make any adjustments you'd like.

Each section has an Edit button that you can click on and the edit screen will open up to the right. Make your color and theme choices, add your content, testimonials, update your contact information or your Listings search criteria. Click Save after updating each section.

Once you make the desired changes, click on Publish and then confirm you want to Publish. Your website is now updated.

If you have additional questions, please watch this [video](#).

You may also reach out to the support team if you need assistance by emailing us at support@therealbrokerage.com or through the support tab in your mobile app.
